Golden Technologies proudly introduces  
its newest luxury lift chair accessory...

Far Infrared Heating by Therasage.

## why far infrared heat?

### ● far infrared heat feels better

Far infrared heat is a natural wave emitted directly from the sun. The deep heat we feel when standing in the sunshine is actually far infrared heat. Now you can have that same beneficial heat in your relaxing chair without harmful UV rays!

### ● far infrared heat lasts longer

Far infrared heat penetrates so well because it gently heats your body from the inside out! When we applied this system to our popular lift chairs the heat lasts long after you exit the chair.

### ● two pads . . . twice the heat!

Why two pads? Twice the heat! Your body also gets twice the access to the heating element to soothe and relax your body. The pads are located in the lumbar area and behind the legs, giving you maximum exposure to the coziest heat ever!

### ● far infrared heat promotes wellness

Far infrared heat provides many wellness benefits. By having this heat system in our chairs you can enjoy both the comfort of our furniture paired with the benefits of far infrared heat!

### ● far infrared heat is natural energy

Far infrared waves are something the body craves for wellness. Have you ever wished for a sunny day? It is the far infrared frequencies your body is asking for. Now you can enjoy the soothing benefits of this heat any time you wish and turn any rainy day into a sunny day right in your own home.

\*Far infrared heating is exclusive ONLY to these chair models and fabric colors.

*The natural healing properties of the sun's light energy are transferred through the safest part of the sun's energy spectrum – Far Infrared Rays.*

*Far Infrared Rays are felt as a deep penetrating warmth into our body's tissues. As we absorb this gentle, safe and soothing heat, we are giving our bodies the necessary wellness and healing properties our bodies need.*

*Golden Technologies and Relax The Back have identified this wellness product and have strategically placed it in our lift and recline chairs to generate maximum responses in the body.*

---

*Please consult your doctor to be sure Infrared heat is safe for you before using this product. Children 6 years old or younger should not operate the equipment unless accompanied by an adult.*

*Please consult a physician prior to use if you:*

- *are 50 or older, pregnant, or have a pacemaker/defibrillator*
- *are afflicted with any diseases associated with a reduced ability to sweat or perspire*
- *suffer from hemophilia or are an individual prone to bleeding*
- *currently have a fever or an insensitivity to heat*
