

Experience a NEW TRADITION in a Value Added Scooter... THE GOLDEN COMPANION SERIES

New Improved Control Panel

Active, with new battery indicator, user friendly horn/horn buttons, diagnostic diode and new power switch.

Self Diagnostic Indicators

State of the art trouble shooting system for the consumer or technician.

Sleep Mode (Auto Shut-Down)

The DS70 sleep mode de-energizes the power relay when the scooter panel is not used for 60 minutes.

3 Amp Battery Charger

Enables the battery to receive a stronger/quicker charge.

Microprocessor based, Service Friendly Electronics

Dynamic Controls DS70 motor control board offering load compensation, on board diagnostics, motor and battery protection and sleep mode.

Load Compensation: Allows the user to maintain a steady speed when travelling up hills/over varying terrain's such as gravel to side walk and carpet to linoleum.
The DS70 diagnostic program: uses flashing L.E.D. (light emitting diodes) code to pin point electrical problems if they occur. One L.E.D. is located on the panel of the motor board the other on the control panel.

New More Efficient Control Board

The motor control board is mounted on large aluminum heat sink with fins that are exposed to the flow of air. This keeps the board cool and improves the overall efficiency of the motor.

Upgraded Ergonomic Armrests

New light weight arms are adjustable in height and width. More attractive and user friendly.

Enhanced Light

Options for additional illumination. Illuminates more than other major manufacturers.

Shorter Contoured Grips

More comfortable. Helps improve maneuverability.

Increased Leg Room

Offers more leg room than any other scooter on the market. "Small to Tall - We Fit Them All"

Improved 8 Position Swivel Seat with back angle adjustment

New swivel lever release is now operational by pulling the lever up/not forward. This is a more natural movement for all users.

Front Basket

Standard

Foam Filled Front Tire

Maintenance free. (Companion only.)

Adjustable Tiller

Streamlined patent pending tiller allows the user to adjust/position to a comfortable level without difficulty.

Removable Automobile Style Carpet

Easy to maintain and keep clean.

Unique Independent Front Suspension (4 Wheel Only)

Allows for a superior ride over rough and uneven terrains.

New Free Wheel Brake Release

The free wheel lever, located in the rear of the unit, releases the brake and the electronics. No longer need to release to a toggle switch on the electronics tray.

Vivid Tail Lights for Added Safety

Extremely visible. Provided for added safety.

Drive Train

Sealed, maintenance free transaxle. Extremely quiet.

Also!

Increased Weight Capacity Companion 300 lbs. Companion II 350 lbs.

Extremely wide cross-section of users.

Heavy Duty Battery Cables

Helps prevent cables from over heating and provides for additional protection from wear.
